EDCampus

Samuel Courthial, Robin Delbos, Sebastian Fougère

Context

EDCampus is a project management website. It allows teachers and students to create and manage various projects.

The users can...

➤ **interact and discuss**, share files and information.
➤ **plan**, create tasks that they can organise through a Kanban or a Gantt.
➤ **manage** their financial and physical resources.
➤ create and ask for deliverables, punctuating the **progress of a project**.

Fig2. Discussion board

Goals

➤ add missing functionalities
➤ correct bugs
➤ create a tool to add a discussion board where project members can have conversations

Methods

➤ Agile methodology
➤ GitLab
➤ WebStorm and PHPStorm

Acquired skills/Achievements

➤ Rise in computer skills
➤ Improvement of our teamwork method
➤ Chat feature

Conclusion

It was a **fulfilling** work to do as it is currently used by many teachers and students in their work projects. And the skills we acquired could help us greatly in our future projects.
