

J'ORIGINE

CUSTOMERS

- Discover producers from new localities
- Buy products straight from the farms
- Help producers to earn their independence from malls

By using an mobile app to find producers on an interactive map

By making orders where they can choose the quantity, and making an appointment with the producers

THE MAIN IDEA

PRODUCERS

- Earn exposure
- Become easier to find
- Shorten the time they need to sell their products

By registering themselves on the app or the website, adding details and sales points

By adding products and prices to be able to sell them from J'origine

TOOLS

IT'S ALL ABOUT GOOGLE!

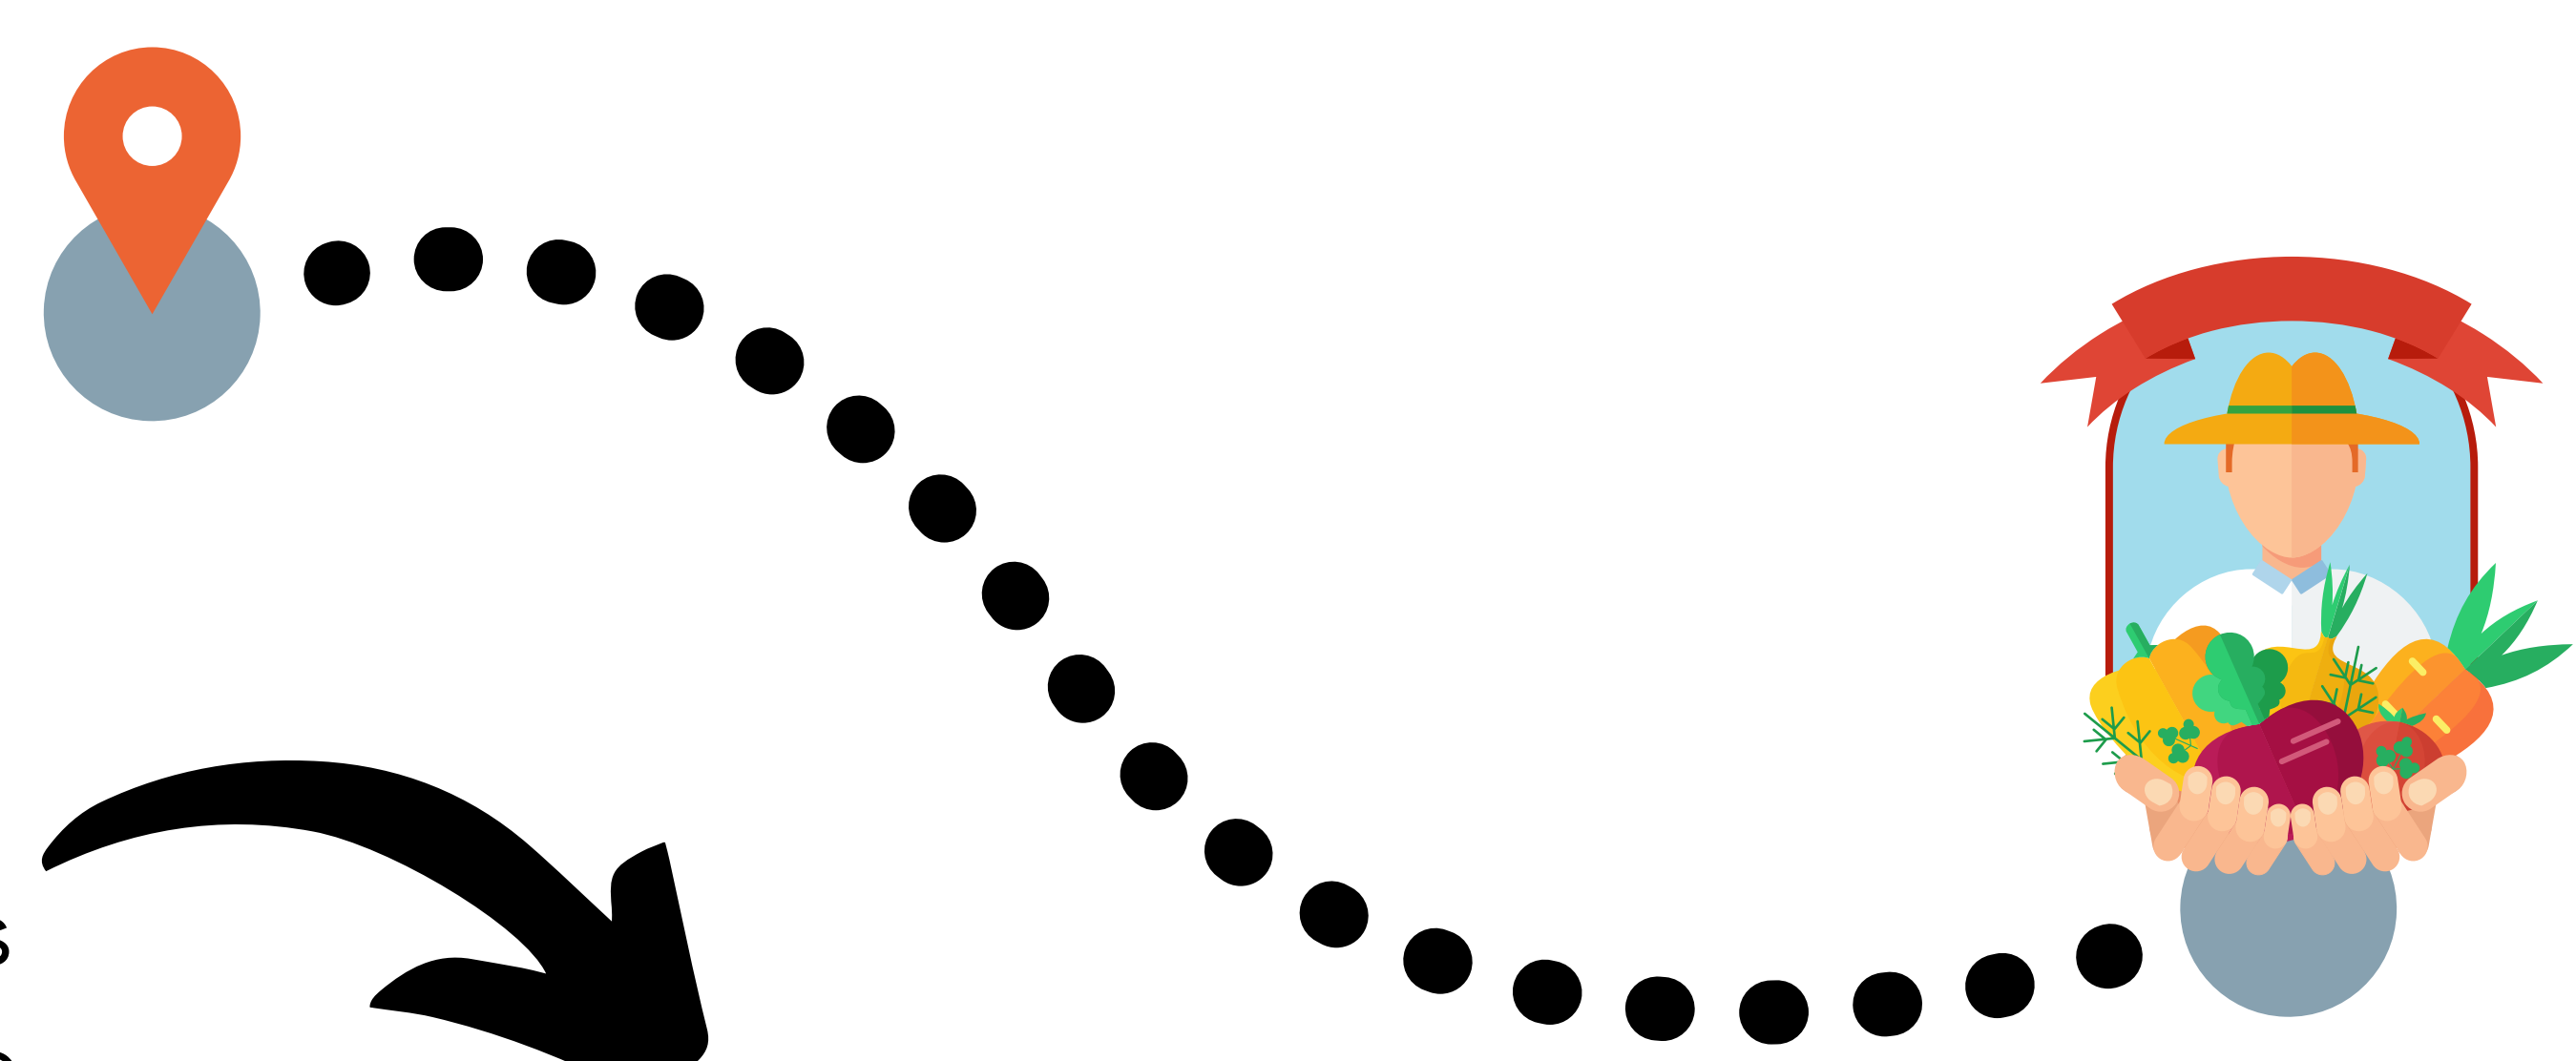

Flutter & Firebase are both technologies developed and maintained by Google inc. to significantly simplify mobile apps & websites creation

FLUTTER, WHO ARE YOU?

Flutter is a framework designed to build different applications for different platforms. With one single source code, you can develop both a **website** and a **mobile app**.

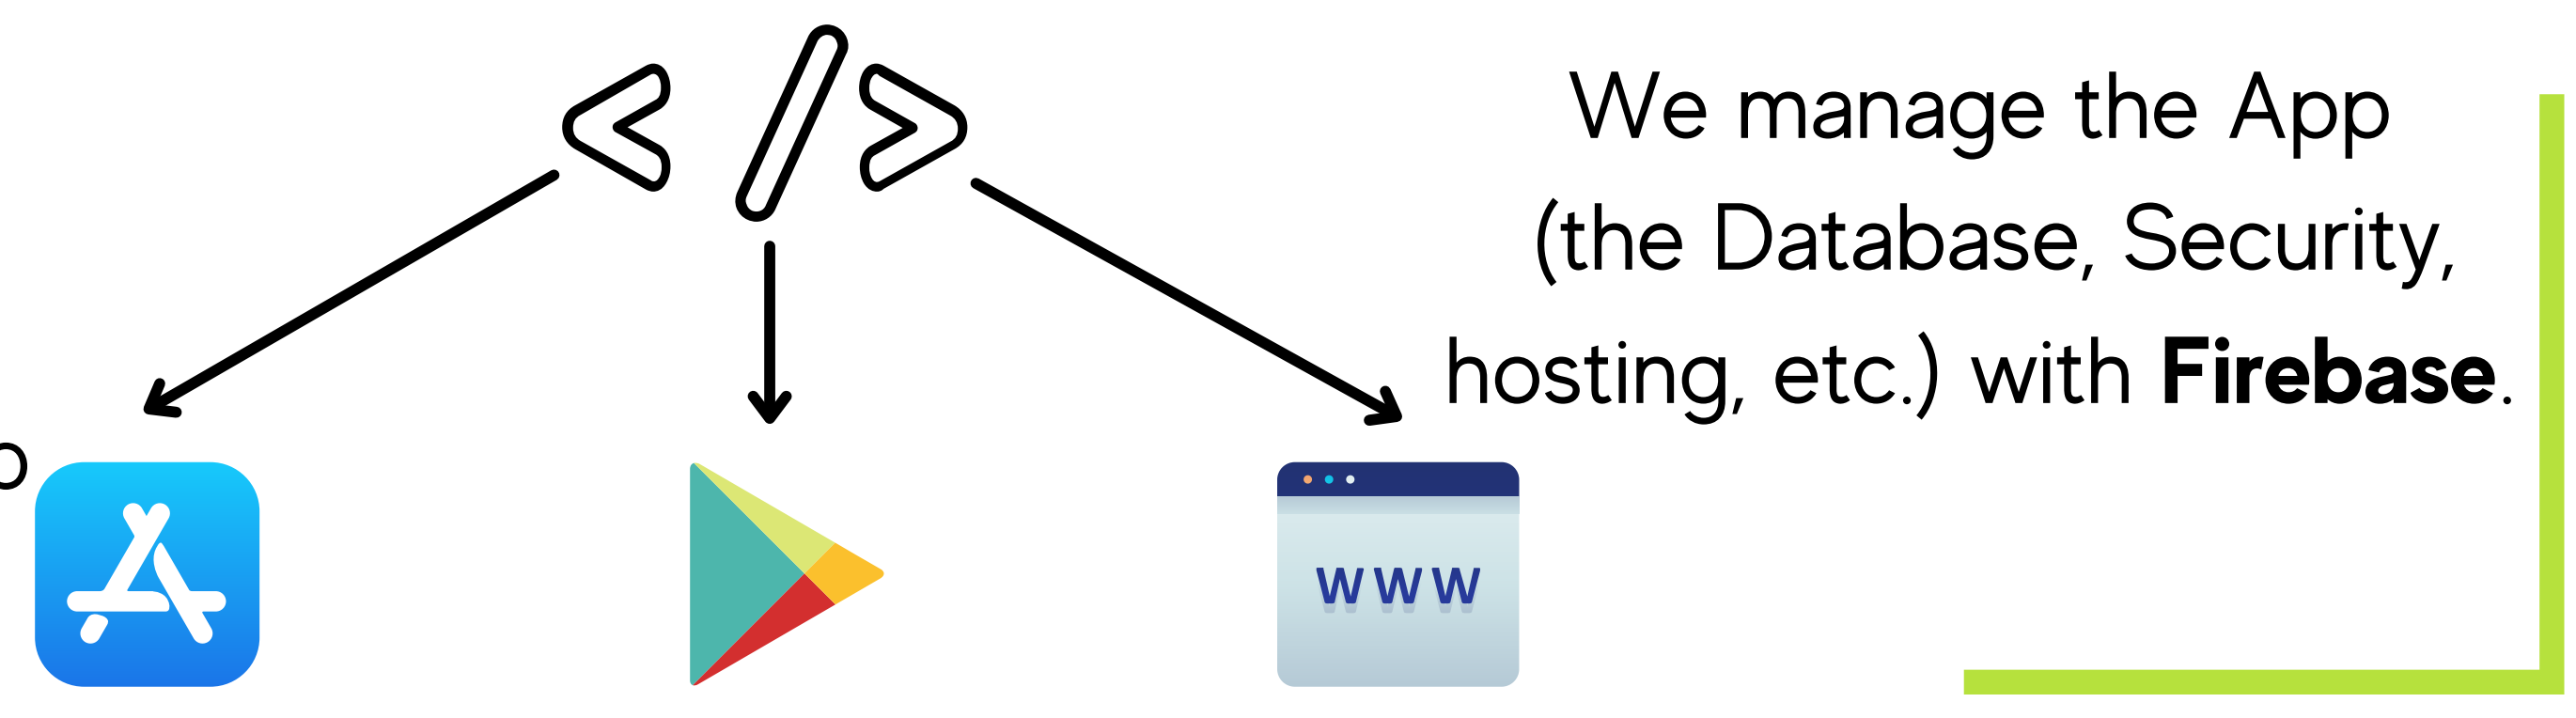

AND YOU, FIREBASE?

Firestore is a set of hosting services for any type of application. It offers **database** hosting and management, notifications, social authentication, and content, as well as services, such as a real-time communication server.

IN BRIEF...

We make the source code with **Flutter**

THE PROCESS
