# OUR SOULUTION

Benefits of Visit360 :
- Open source
- Intuitive,
- huge potential for development

Future of the project :
- Add spatial sounds and music to visits,
- Addinteractive video
- Add artificial intelligence to recognize doors, people ...
TECHNOLOGIES USED

GITHUB

VISIT360 VIRTUAL TOUR EDITOR

Website allowing the creation of virtual tours from panoramic images

WHAT IS OUR GOAL ?

Create a web application allowing users to make their own virtual tours

Features:
- Navigate through panoramas
- Moving from one panorama to another
- Add information
- Have access to the history
- Find yourself on the Minimap
- Edit the MiniMap based on the floor plan

WHAT IS A VIRTUAL TOUR ?

A virtual tour is an immersive and interactive tool that allows you to visit a place in a 360° environment from panoramic images.

Panorama indicates an unbroken view, since a panorama can be either a series of photographs or panning video footage.

OUR WORK

Plan   Design

Development   Test
