

1 - What is a virtual tour?

A virtual tour is an immersive and interactive tool that allows you to visit a place in a 360° environment.

5 - Solution

-Benefits of Visit360:

Open source, intuitive, huge potential for development

-Future of the project:

Add spatial sounds and music to visits,
Add artificial intelligence to recognize doors, ...

2 - Context

-Development team:

Ayman FAGHLOUMI, Justin NGUYEN,
Clara BERNERD

-Tutor & projet leader : Didier DONSEZ

-Location : Polyetch Grenoble

3 - What is our goal?

Create a web application allowing users to make their own virtual tours from panoramic images

- Features:

- Navigate through panoramas
- Moving from one panorama to another
- Add information
- Have access to the history
- Find yourself on the Minimap
- Edit the MiniMap based on the floor plan

- Technologies:

4 - Our work
