Presentation

Context: Students want to recycle their waste, but their need is not satisfied.

Recycling connected dumpster that answers this need and rewards student for sorting.

Goal: create an app to display the data gathered by the dumpster which are sent to the server.

Sign up / Sign in

**List of
rewards/merchants**

**Identification of the
user on the
connected dumpster**

**Asking for the
reward**

**Management of
user's point**

**Displaying
statistics about
waste**

ionic
MOBILE APP DEVELOPMENT

JHipster

Conclusion

- **Very interesting and concrete project**
- **Real product owners**
- **Starting from scratch**
- **Learn to use JHipster = real gain of time**
- **Improve our skills with Ionic**

Demonstration
