- Secure •

How is this different from virtual machines?

How does this help you build better software?

- Accelerate developer onboarding
- Empower developer creativity
- Eliminate environment inconsistencies

Easily Share and Collaborate on Applications

- Distribute and share content
- Simply share your application with others

Ship More Software Faster

- Ship 7X More
- Quickly Scale
- Easily Remediate Issues

Free as in Freedom

Collaborative IaaS

« Cloud computing is a model for enabling ubiquitous, convenient, on-demand network access to a shared pool of configurable computing resources (e.g., networks, servers, storage, applications, and services) that can be rapidly provisioned and released with minimal management effort or service provider interaction. »

You want to make money by sharing your resources?

You want a cheap cloud computing service?

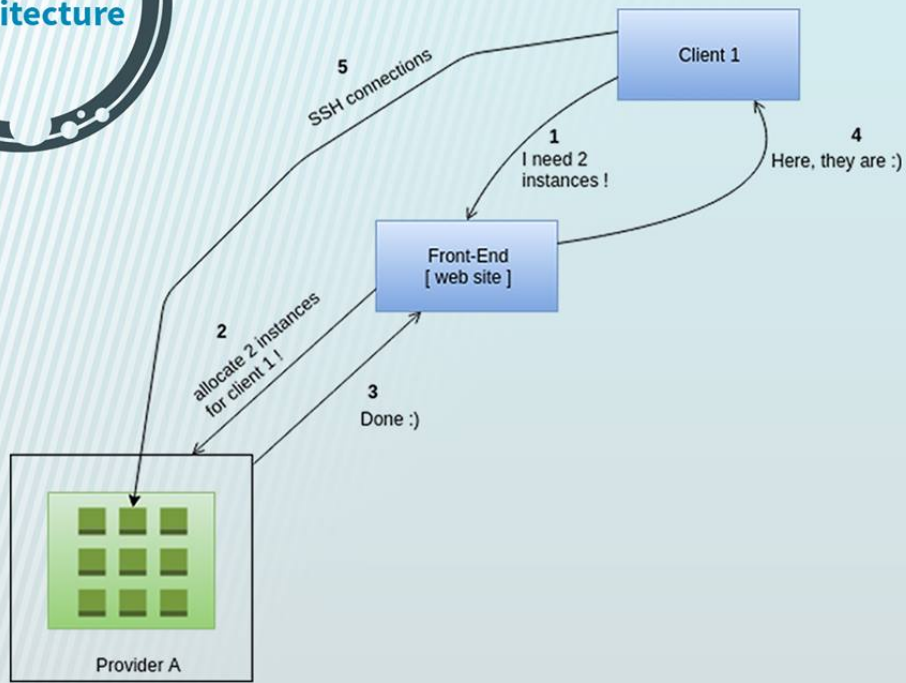

Try our's!
