Résistance
38400 St-Martin-d'Hères

Let's go out is the first application entirely free that you can use to socialize.

It can be about sport, cinema, culture or anything else.

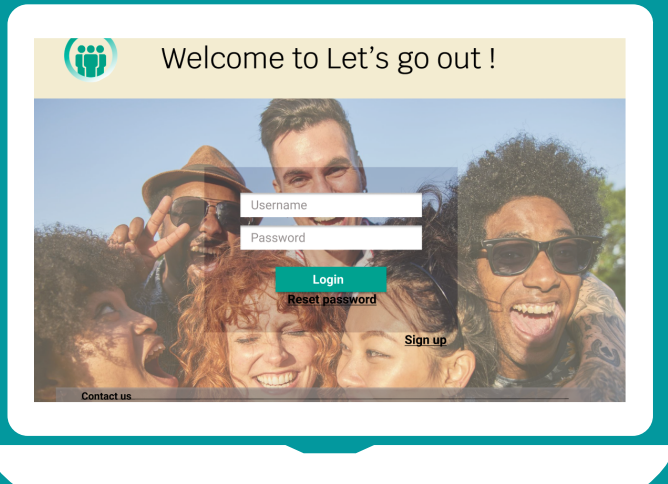

You are free to create your own activities and invite people.

You can also create groups and invite people you've met !

Let's go out

Our objective was to create an intuitive application that is not age limited.

We aim to have around **100 active** users after the first launch month, and around **20 times more** after one year, so help us reach our goal !

Covid-19 has narrowed our opportunities to **meet new people**. Our app is the best solution to find people with the same hobbies as you !

This application is available on your smartphone **AND** your computer !
