# Description

Aims:

Fix bugs and bring new features

Subject:

- Free of charge web application
- Easy to learn approach on project management

Method:

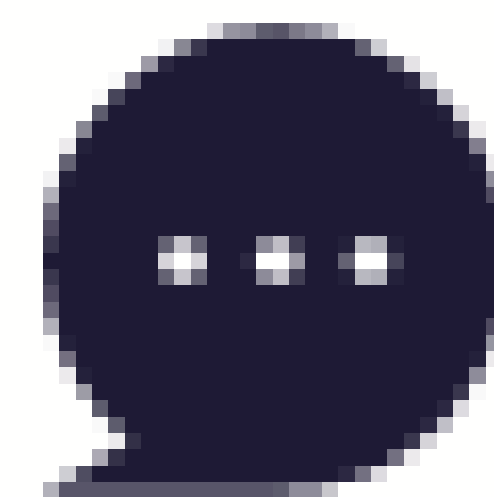

Technologies and platforms:

Context

- Free online platform for students , teachers and companies
- Started in Nancy then bought by UGA and turned into an open-source project
- We are Contributors to the project

Detail

- We used all the knowledge built from ECOM project (S9)
- Research on new ways to improve the application: new librairies, new API services
- We contributed in maintaining and developping new features by modifying existing code : preview of files, adding a WYSIWYG editor, modifying help tools.

EDCampus

Discussion

- We discovered some new technologies.
- We know the core concept and mechanism behind this language which will help us have a first introduction to this project
- We'll build experience on a different field from what we've studied in class, allowing us to become more polyvalent.
- We want to bring contribution to a real project used by people.

Conclusion

- We bring our contribution to a real project which is used by many people.
- We have learned new technical skills and we have dicovered a new platform
- It is a first step towards the end of year intenship and thus our first job.
