

Midway presentation Connected Greenhouse

Timothée Depriester
Guillaume Besnard

Subject

The project consist of *upgrading* a classic greenhouse to retrieve live information about its climate. The farm exploitation is located in Saint-Cassien (38500), in the French Alps.

- No power in the zone
- Sensors needs to be moveable to let vehicles move along the greenhouse

Technical choice

01

MBed & Gateway

02

Node red, Mosquito, InfluxDB & Grafana

03

Docker automation
