4. Demonstration

Introduction

Creation from scratch of an android application

application designed to manage a group.

This application must be functional without
stable internet access

1. The problematic

1 - The problematic

Need of
adapted way of
communication
in extreme
conditions.

1 - The problematic

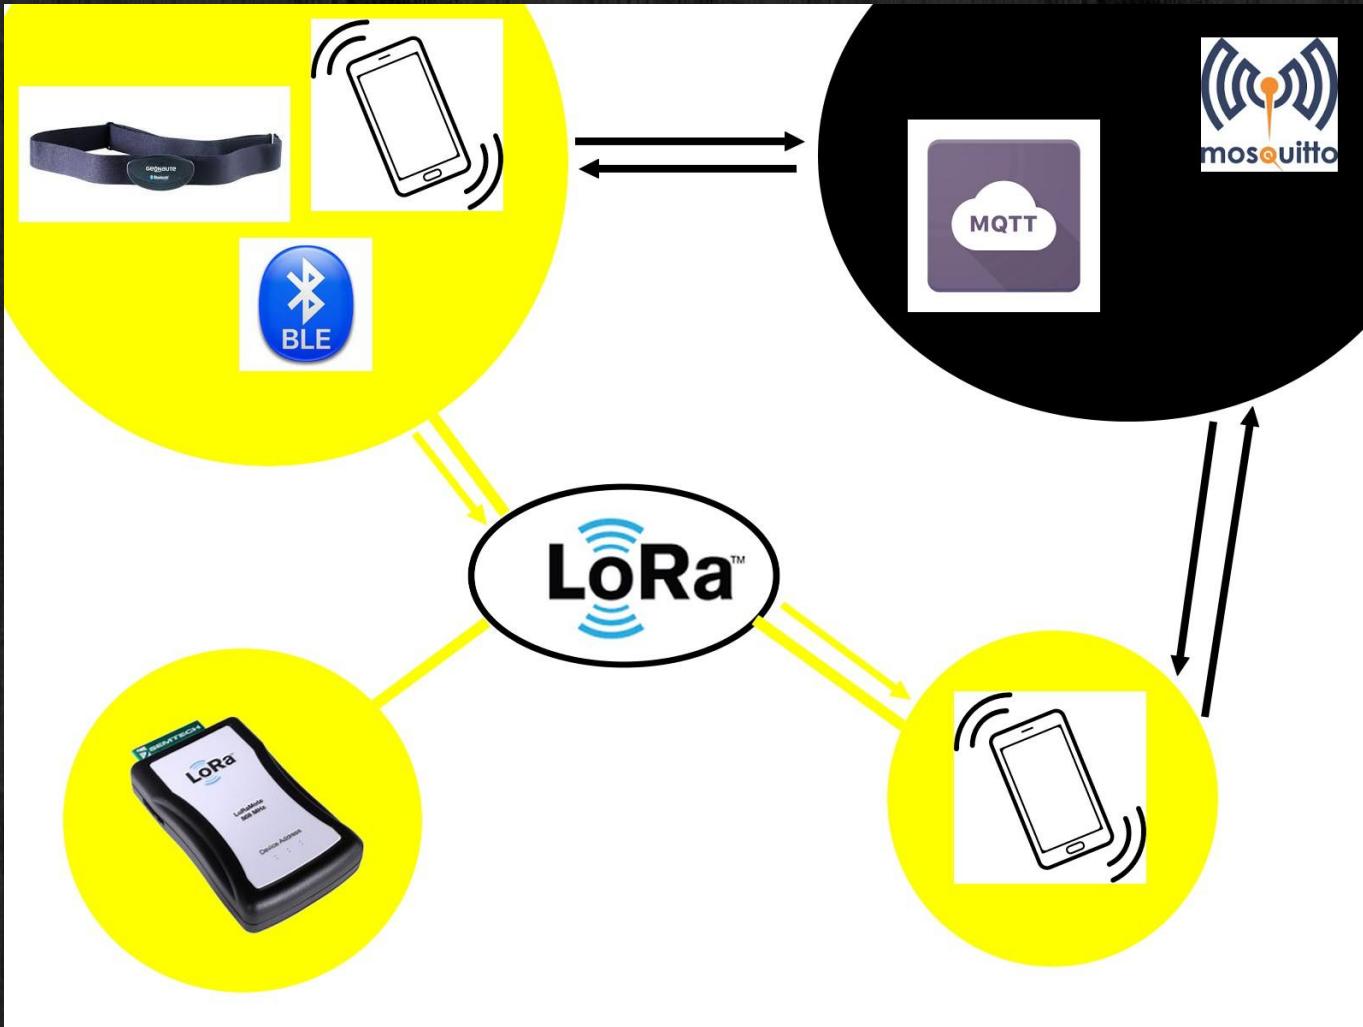

Goals of the app :

- Provide a map
- Provide the members of the group's position
- Provide a bluetooth connection
(to retrieve heart rate)
- Functional without internet access
- Store data on a server if an internet connexion is available

2. The technologies used

2. The technologies used

Lora

Use of LoRamote.
Flashed with code from
LoRa-net.
Emission only

Use of RN2483
modem.
Needs OTG phone
Emission-Reception

The Bluetooth low energy

Bluetooth low energy => extended lifetime

Managed by BluetoothLeGatt

Used to retrieve heart rate

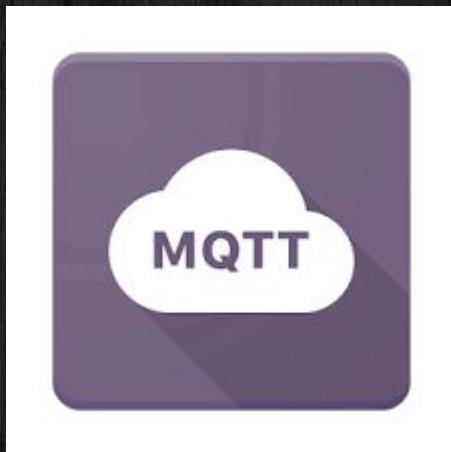

MQTT protocol

-Message broker on ovh serv

-Use of android paho mqtt

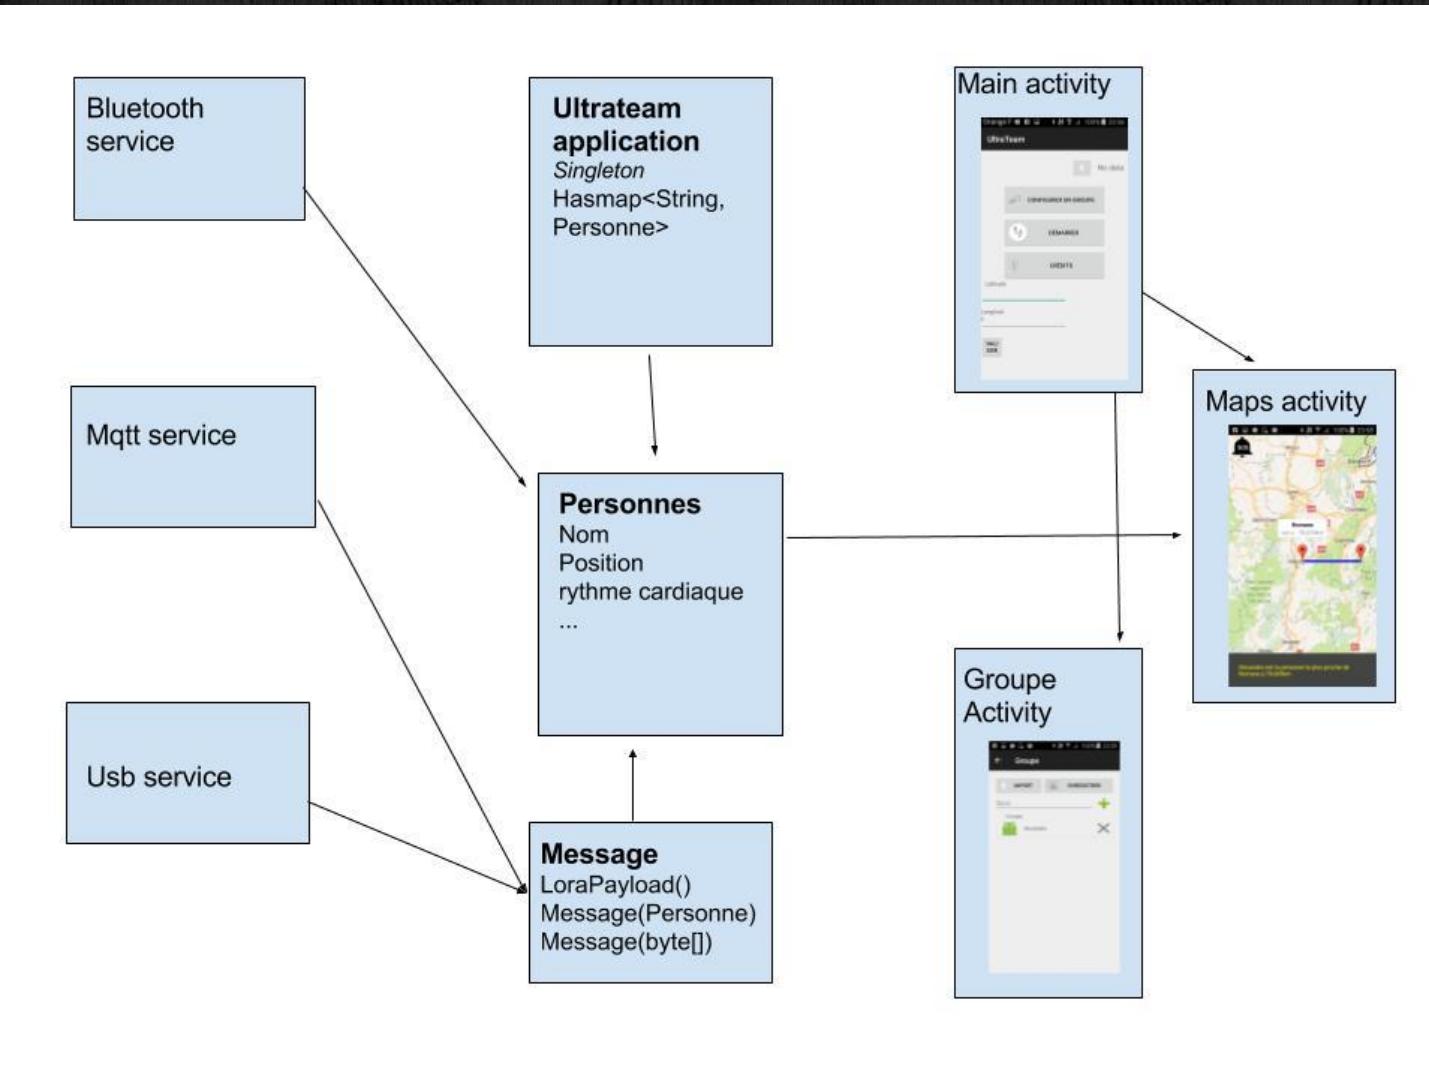

-publish on ultratrail/MyUserID

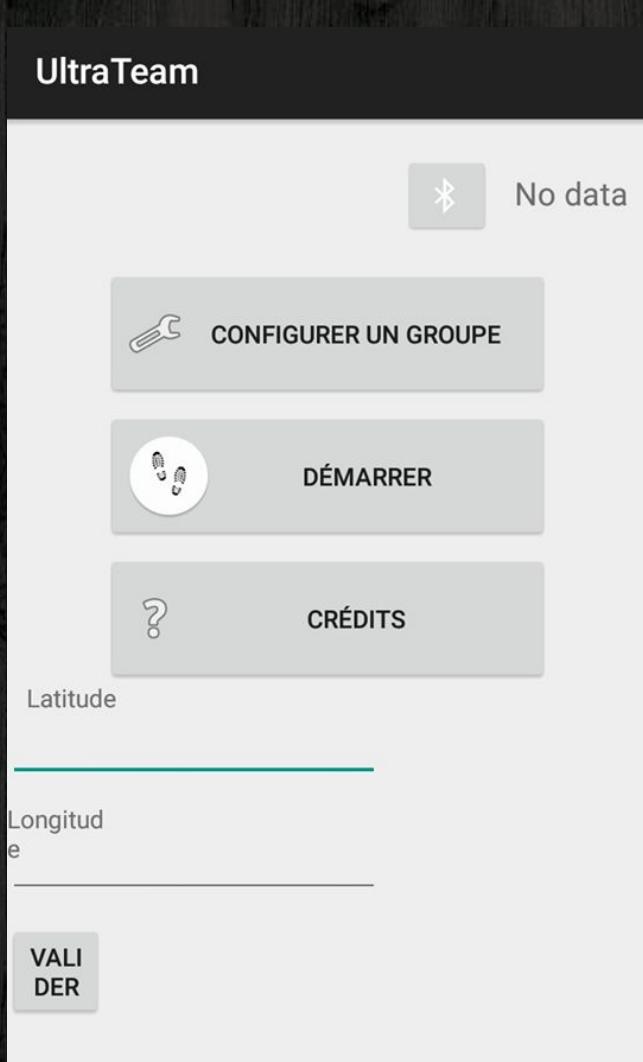

-Subscribe to
ultratrail/MemberID
